SM-KIT: The Do-It-Yourself Installation Sound Masking Kit

Includes everything needed for a simple installation and will effectively mask 900 to 1,000 square feet. The kit includes (1) SMG-1R, (1) MA-30 AND (4) SM805. Ships complete with installation drawings and 500 ft. plenum wire.

The sound masking generator (without amplifier) shall be Model No. SMG-1R. The generator shall produce a pink or white noise signal. It shall have a balanced low-impedance line output that may be switched between line level (500mv) and mic level (5mv) and a high-impedance unbalanced line output (500mv). Controls shall include output level and low pass filter. The chassis assembly shall be formed from heavy gauge steel and finished in black powder epoxy paint. Chassis shall measure 19"W x 4"D x 1.75"H. An external power supply with four plug adaptors shall be included.

MA30: Mixer/Amplifier

Mixer and 30W power amplifier with 4 ohms, 8 ohms, 25V and 70V speaker outputs at screw terminals. Powered by 120VAC 60Hz, the main AC input is protected by a circuit breaker in back. The AC power outlet in the rear is protected by a separate circuit breaker. Available by itself or in a kit with mounting brackets. Mounting brackets for 19" rackmount, half-rack, or wall mount may be purchased separately.

AVL's SM805 Speaker

SM805A sound masking speaker ships completely assembled for suspended installation. It includes an 8 in. 12W driver with factory-wired 70V (4W) transformer mounted in a 325 cu.in. backbox with grille, pre-installed wire hangers, and a separate 4 ft. chain. The installer friendly system features externally accessible speaker leads at a single gang handibox cover with a 1/2 inch Romex connector.
